## **Drawings**

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "the laser beam of the first wavelength and the laser beam of the second wavelength are emitted from an optical pick-up head"; "the first predetermined signal is an S-curve or an RF level signal"; "the second predetermined signal is an S-curve or an RF level signal" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Chen et al. (US 2005/0058036)'s the admitted prior art.

Regarding claim 1, discloses a method for determining existence of a disk in an optical disk drive, the method comprising: focusing a laser beam of a first wavelength, and determining whether a disk is inserted into an optical disk drive according to generation of a first predetermined signal; and focusing a laser beam of a second wavelength, and determining whether a disk is inserted into an optical disk drive according to generation of a second predetermined signal (see [0004] and Figs. 2A and 2B).

Regarding claim 2, discloses the method of claim 1 wherein the laser beam of the first wavelength and the laser beam of the second wavelength are emitted from an optical pick-up head (see Fig. 1).

Regarding claim 3, discloses the method of claim 2 wherein the step of focusing comprises moving the pick-up head for changing a focal point, and the method further comprises receiving a focus error signal from an photo detector (inherent, see [0004]-[0005] and Fig. 2).

Regarding claim 4, discloses the method of claim 1 wherein the first predetermined signal is an S-curve or an RF level signal (see Fig. 2).

Application/Control Number: 10/711,947 Page 4

Art Unit: 2627

Regarding claim 5, discloses the method of claim 1 wherein the second predetermined signal is an S-curve or an RF level signal (see Fig. 2).

Regarding claims 6-10, see rejection above of claim 1-5, respectively.

## Cited References

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited references relate to method and apparatus for discriminating between different types of discs (US 7,038,986); an optical pickup capable to discriminate between a DVD and CD (US 6,434,094); The EVN signal and the AS1L signal change due to the focal point F for the CD and the focal point F for the DVD, the FE signal has a level change, generally called an S-curve, when the focal point FCD or FDVD passes through the information face of the disk (US 5,831,952); The signal waveform observed in those figures represents a focus error detection feature referred to as S curve and the operation of the shifting the lens is referred to as focus search (US 6,243,341).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to VAN T. PHAM whose telephone number 571-272-7590. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wayne Young can be reached on 571-272-7582. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
